## **"The Girl I Am, the Change I Lead": Empowering Girls in STEM for a Brighter Future**

As we celebrate the International Day of the Girl Child 2025, the theme "The Girl I Am, The Change I Lead" resonates deeply with the need to empower girls in STEM (Science, Technology, Engineering, and Mathematics) fields. Girls are increasingly taking the lead in driving innovation, solving global challenges, and shaping the future. By supporting and encouraging girls in STEM, we can unlock their potential to become change-makers and leaders in their communities.

### **Girls in STEM: The Future Leaders**

- **Innovation:** Girls in STEM are developing solutions to real-world problems, from climate change to healthcare.
- **Leadership:** By pursuing STEM education and careers, girls can develop the requisite skills and confidence to lead and inspire others.
- **Resilience:** The training in STEM builds resilience in girls as they must stay at it until solutions are proffered for identified challenges.

### **Empowering Girls in STEM:**

- **Access to Education:** Ensuring girls have equal access to quality STEM education and resources.
- **Mentorship:** Providing girls with role models and mentors in STEM fields to guide and inspire them.
- **Supportive Environment:** Creating a supportive environment that encourages girls to pursue STEM careers.

STEM education empowers girls to make informed decisions about their lives, health, environment and well-being.

### **Let's Unite to Empower Girls in STEM:**

On this International Day of the Girl Child, let's commit to supporting and empowering girls in STEM. By working together, we can create a brighter future where girls can thrive, lead, and drive positive change.

### **Key Actions:**

- **\*Support Organizations\*:** Donate to or volunteer with organizations promoting girls' education in STEM.
- **Mentorship:** Share your expertise and experience with girls interested in STEM.
- **Advocacy:** Promote policies and initiatives that support girls' participation in STEM.

Together, let's empower girls to lead in STEM and shape the future!\*

The month of October started with a town hall meeting and health awareness seminar. APWEN Lagos scheduled two great speakers in the health sector to do justice to the topic. Dr Adaobi Eberé, a consultant family physician and Dr Oluwagbemiga Durojaiye, also a consultant family physician and a Geriatrician teamed up to educate the audience on the importance of knowing your numbers. The health seminar started with Hypertension, the silent killer where the audience was intimated on the Risk factors, Diagnosis, Complications and Treatment. An alarming information was that hypertension affects 1

in 3 adults worldwide which meant that it was a condition that should receive utmost attention. The doctors shared some lifestyle management tips such as exercises, weight control and eating healthy diets to mention just a few. In conclusion, all those in attendance were challenged to be familiar with the numbers of basic health status.

ENGR NNEAMAKA GRACE  
EKECHUKWU FNSE  
Chairman, APWEN, VICTORIA ISLAND CHAPTER  
CO-HOST

#### THE PRESENTER:

Dr. Adaobi EBERE, is a Consultant Family Physician, a Fellow of the West African College of Physicians (FWACP). She has a strong commitment to providing evidence-based, compassionate, and holistic, patient-centered care. Her focus is on the health and well-being of individuals and families across all ages and sexes, emphasizing preventive care, early intervention, and long-term support. She practices at Nigerian Navy Reference Hospital, where her key responsibilities include managing emergency cases, treating both acute and chronic conditions, and providing clinical guidance to junior colleagues. Her practice is built on the belief that medicine is not only about treating illness but also about listening, educating, and empowering patients to live healthier lives.

Beyond medicine, she enjoys reading novels and watching movies. She is also an engineer by association as she is married to an engineering research scholar (and fellow) and they both have three lovely children.

## **10 Breast-Cancer Awareness Tips**

1. Know your family history – Genetics play a big role; share any cancer cases with your doctor.
2. Get regular mammograms – Start as advised (usually  $\geq 40$ yr or earlier if high-risk).
3. Do monthly self-exams – Check for lumps, skin changes, or discharge; note any new findings.
4. Stay at a healthy weight – Excess body fat raises estrogen levels, increasing risk.
5. Exercise regularly – Aim for  $\geq 150$  min moderate activity weekly.
6. Limit alcohol – Even 1–2 drinks/week can modestly raise risk; keep it low or avoid.
7. Avoid smoking – Smokers have higher rates of breast-cancer development.
8. Eat a balanced diet – Plenty of fruits, veggies, whole grains, and lean protein; limit processed foods.
9. Be aware of hormone therapy – Discuss alternatives if you need long-term hormone replacement.
10. Know the warning signs – Lump, dimpling, nipple retraction, persistent pain, or unusual discharge; seek medical advice promptly.

In collaboration with Osaide for Girls in Science and Engineering Foundation, APWEN Lagos joined to celebrate the International Day of the Girl Child at Baptist Junior High School on 15th October, 2025. In line with SDG17, partnership for goals, one of our goals is to encourage the girl child to develop interest in STEM particularly Engineering. Health talks, Finance talks, motivational talks (The STEM girl that I am) and quiz competition were highlights of the event.

APWEN Lagos was present at the Nigeria Belgium Luxembourg Business Forum on 28th October, 2025. Picture shows the Executive Governor of Oyo State, HE, Engr Seyi Makinde, FNSE, CEO IITA-BIP and Director of the State Agribusiness Development Agency, Dr Debo Akande, Chairman, APWEN Lagos Chapter, Engr Bosede M. A public lecture titled ‘**Financial Literacy 101 – “Think Short Term, Long Term & Act today”**’ had two seasoned speakers, Dr Samuel Adeoye and Engr Titilola Bright- Oridami FNSE. They delved into the importance of being financially literate which a key component of excellent display of professionalism. Some of the organs of making money were highlighted which are money market, capital market, real estate, business, sale of skills, and content creation. The lecture focused on money market which is a segment of the financial market where financial instruments with high liquidity and very short maturities (less than one year) are traded. Mention was made of all the money market instruments and what to consider before investing in that market, which includes risk appetite, age, knowledge, liquidity amongst others. Examples were given of where to invest and the lecture was concluded with discussions on barriers to women’s wealth accumulation.
